continuous learning...continuous improvement

Accredited Kanban Trainer Program
TRAIN THE TRAINER

A 5-DAY RESIDENTIAL PROGRAM TO BE RUN 4 TIMES/YEAR
Maximum of 12 attendees per event.

The objective of this course is to train experienced trainers or consultants to deliver basic 1-day and 2-day Accredited Kanban Training classes. Attendance at this 5-day course is required as part of the Lean-Kanban University Accredited Kanban Trainer Program.

Course Agenda

Day 1: Teaching the basics of Kanban systems

Day 2: Use of games and simulations

Day 3: The System Thinking Approach for Introducing Kanban

Day 4: Practical, pragmatic, experiential group exercises to reinforce learning and build the practitioner's confidence

Day 5: Teaching models for incremental improvement and evolutionary change:

- Theory of Profound Knowledge and SPC (Statistic Process Control)
- Theory of Constraints; Bottlenecks and non-instant availability
- Lean waste "muda, mura and muri" and environmental costs
- Real Option Theory
- Cynefin and complexity

Each participant is expected to bring a case study presentation that highlights extensive aspects of Kanban in use. Case study presentations by participants will be spread throughout five days of the workshop and evaluated by the trainers and other trainees.

The trainers for these workshops will be David J. Anderson and other experienced Kanban trainers, for example, **Mike Burrows** and **Dominica DeGrandis**.

About the Primary Trainer

David J. Anderson is a thought leader in managing effective software teams. He leads a consulting, training and publishing business dedicated to developing, promoting and implementing sustainable evolutionary approaches for management of knowledge workers.

He has 30 years experience in the high technology industry starting with computer games in the early 1980's. He has led software teams delivering superior productivity and quality using innovative Agile methods at large companies such as Sprint and Motorola.

David is the author of two books, Agile Management for Software Engineering – Applying the Theory of Constraints for Business Results, and Kanban – Successful Evolutionary Change for your Technology Business.

David is a founder of the Lean Kanban University, a business dedicated to assuring quality of training in Lean and Kanban throughout the world.
